DANIEL SALAS PERAZA Et. al.)	Research Law 9234
)	ARTICLE 386 and 381 Intl. Crimes

In this particular case, the events denounced concern misrepresentations to the truth that the accused, DANIEL SALAS PERAZA Et. al, in his capacity as Minister of Health of the government of the 2018-2022 period, rendered before the Constitutional Chamber in files 21-007845-0007-CO, 21-016342-0007-CO, 21-016877-0007-CO, 21-015890-0007-CO, 21-020862-0007-CO, 21-020206-0007-CO and 21-015069-0007-CO, as described above. DANIEL SALAS PERAZA Et. al was expressly ordered to answer personally, because he was the only one with firsthand knowledge.

These files were born to legal life due to the right of response that the complainant Interest of Justice, had at that time with respect to various queries he had made to the then Minister of Health, the accused DANIEL SALAS PERAZA Et al.

The complainant stated that once the Constitutional Chamber admitted his complaints for study, it required Mr. DANIEL SALAS PERAZA Et al to submit the corresponding reports, which were requested under oath.

In complainants opinion, the defendant SALAS PERAZA Et al. was untruthful in the statements he made about his own facts in the reports requested by the Constitutional Chamber.

In complainants opinion, the defendant SALAS PERAZA Et al. was untruthful in the statements he made in his reports and freedom of information requests, therefore affirms a falsehood or denies or conceals the truth, in whole or in part, in his deposition, report, interpretation or translation, made before the competent authority.

Count 1, Under oath, in file 21-007845-0007-CO, the defendant SALAS PERAZA Et. al; indicated that *The statistics on the number of people who died in the covid-19 pandemic were one hundred percent accurate because the because the PCR test is the "gold standard" for diagnosis which WHO recommended it in the 1st Charite protocol from January 2020 covid guidance and the Mortality Commission checks every death for "death by covid".* The accused himself reportedly told the press that *the statistic was ninety percent accurate and in reality the Mortality Commission had only examined about 20% of the dead bodies.* The method of testing is based on PCR ruled "unscientific" in Lisbon Portugal court and no cases can be accurately confirmed.

Count 2, Under oath, in file 21-015069-0007-CO, the defendant SALAS PERAZA Et. al indicated that *the complainant's e-mails, through which he requested a series of answers from his office, had not arrived*, which is apparently false, since the offended party consulted his mail provider Protonmail, who indicated that his e-mails had been delivered.

Count 3, Under oath, in file 21-015890-0007-CO, the defendant SALAS PERAZA Et. al indicated that *the complainant's e-mails, through which he requested a series*

of answers from his office, had not arrived, a fact that seems to be false, since the offended party consulted his mail provider Protonmail, who indicated that his e-mails were delivered.

Count 4, Under oath, in file 21-016342-0007-CO the defendant SALAS PERAZA Et. al indicated that *the Pfizer-BioNtech vaccine had been approved by the FDA (Food and Drug Administration) on August 23, 2021*, being this information apparently false because the vaccine that was approved was Pfizer's comirnaty. The accused also indicated that *BioNtech was safe because it had approved all the phases*, being this information apparently false because the vaccine only approved the first three phases, not the fourth phase.

Count 5, Under oath, in file 21-016877-0007-CO, the defendant SALAS PERAZA Et. al indicated that *the FDA & WHO approved the existence of the Ethics Board and that the protocols of the clinical studies of the COVID-19 vaccine are approved by scientific ethics committees and in compliance with current international regulations for research with humans (including Nuremberg Code)*", which is false, since it seems that the Ethics Board does not exist and has not been approved by the FDA or WHO and there is no compliance with current international regulations for research with humans (including Nuremberg Code).

Count 6, Under oath, in file 21-018029-0007-CO, the accused SALAS PERAZA Et. al indicated that as Minister of Health, *he did not have the duty to inform the Secretary General of the United Nations about the Siracusa Principles, which are the limitations in the exercise of the rights of citizens in emergency situations*, being this information apparently false because he did have the obligation to inform the UN about limiting peoples rights under Siracusa Principles.

Count 7, Under oath, in file 21-020206-0007-CO , the accused SALAS PERAZA Et. al indicated to the offended party, as well as reiterated in letters, *that the Pfizer vaccines applied to the Costa Rican population were not in the experimental phase*, the accused lied about it since he also indicated that the vaccines were under investigation and imported under 117, "***for exclusive purpose of human research***", which in the biomedical research law 9234 and 39061-S and FDA website is the same, investigation and experimentation. See: Document MS-DM-2341-2022 San José, March 14, 2022 from case # 21-020206-0007-CO / 10-10-21

Count 8, The accused SALAS PERAZA Et. al indicated to the offended party under oath in file 21-016877-0007-CO that *the covid vaccines are vaccines*, which is false because the product is not a vaccine as defined in 32722 1 p, it is actually an experimental gene therapy and biological agent which does not confer immunity and is shown to cause harm to biological functioning and death by integrating into human DNA, potentially affecting the human germline genome heritage of humanity which CCSS and PAHO say "*do not act like regular vaccines and therefore require additional safety protocols*".

Count 9, The accused SALAS PERAZA Et. al indicated to the offended party under oath in file 21-016877-0007-CO that "***None of the COVID-19 vaccines used in Costa Rica has been approved as of today for use in children. However, the protocols of the clinical studies of the COVID-19 vaccine are approved by scientific ethics committees and in compliance with current international regulations for research with humans (including Nuremberg Code)***" that the defendant has demonstrated he clearly knows when he recommended covid vaccines for all people and ordered the forced injection of health workers, government workers and children in Costa Rica, it was research in humans, outside the clinical trial, and knowingly omitted what is required for informed consent by using deception, disinformation, manipulation, coercion, threat and other illicit means of false testimony constituted and still does

constitute “human experimentation in violation of Nuremberg 1, 3, 5, 7, 8 and the Biomedical Research law 9234 Article 79 serious undue experimentation.

Count 10, Salas et al, creates a common danger to persons, through the emission, propagation, or impact of covid-19 "vaccine" toxic or dangerous substances or chemicals, agents or toxins of a biological nature.

Count 11, the accused SALAS PERAZA Et. al does not comply or does not enforce, in all its extremes, the order issued by a jurisdictional body or by a public official in the exercise of his functions, which has been personally communicated by Sala 4 in file 21-016877-0007-CO

Count 12, The accused SALAS PERAZA Et. al, indicated to the offended party under oath in file 21-016877-0007-CO that “*Vaccines are the most effective preventative approved treatment that exists to prevent a disease*”, which is apparently false because even the normal vaccines are not as effective as HCQ in preventing diseases like covid according to PAHO studies

Count 13, The accused SALAS PERAZA Et. al, indicated to the offended party under oath in file 21-016877-0007-CO that “*covid-19 vaccines save lives*”, which is apparently false because evidence shows the covid so called vaccines killed more people than all vaccines combined in history and killed far more people than can be scientifically attributed to the alleged covid virus.

Count 14, The accused SALAS PERAZA Et. al indicated to the offended party under oath in report # MS-DM-0318-2022, San José, 24 January 2022, page 3, “*When the World Health Organization (WHO), on March 11, 2020, elevated the public health emergency situation caused by COVID-19 to an international pandemic given the rapid evolution of the facts, it caused health authorities at national and international*

level to adopt immediate and effective measures to deal with these extraordinary circumstances of an unprecedented health crisis of enormous magnitude, both because of the very high number of people affected and the extraordinary risk to their lives and rights.”, which is false because concrete evidence shows there was no extraordinary circumstances of an unprecedented health crisis of enormous magnitude, there was not a very high number of people affected worldwide or in Costa Rica and there was no extraordinary risk to their lives and rights posed by the alleged covid virus, which has a mortality rate and symptoms exactly same as than flu.
